

# Curriculum Vitae – Mr. Arash Shahsavari

---

Mobile Phone	+46 70 712 63 22
Email	<a href="mailto:arash8579@hotmail.com">arash8579@hotmail.com</a>
Web	<a href="#">🌐</a> , <a href="#">📄</a> , <a href="#">webpage</a>

## Education

- 2016 - 2019 M.S. in Complex Adaptive Systems - Chalmers University of Technology**  
Gothenburg, Sweden  
Thesis: *An Evaluation of Multi-Step Analyses of Single-Cell RNA Sequencing Data*.  
Advisor: Rebecka Jörnsten.  
Selected Coursework: Neural Networks, Stochastic Optimization, Information Theory, Dynamical Systems.
- Fall 2017 Exchange Studies - Dongguk University**  
Seoul, South Korea  
Selected Coursework: Multiple View Geometry, Deep Learning.
- 2013 - 2016 Electrical Engineering - Lund University**  
Lund, Sweden  
Completed 3 years of a 5-year joint B.S./M.S. program in electrical engineering, equivalent to a B.S. degree.  
Selected Coursework: Multivariable Calculus, Control Theory, Mathematical Statistics, Numerical Analysis.

## Experience

- 2019- Bioinformatician at Cambridge Stem Cell Institute, University of Cambridge**  
Cambridge, UK
- Long-term data science support for multiple biomedical projects (50+ datasets for 10+ different projects).
  - Machine learning and statistics on terabyte-scale datasets
  - Involved in entire recruitment pipeline, from designing recruitment test, to selecting candidates for interviews, interviewing and final recruitment decisions
  - Co-authoring peer-reviewed publications
- 2018-2019 Volunteer at Kodcentrum**  
Gothenburg, Sweden
- Teaching coding to children from underprivileged areas
  - Planning and structuring classes, hands-on support to children and other volunteers
  - Long-term development of the learning platforms and curriculum

## Selected Research Projects

- 2020-2021 ClustAssess: Tools for scRNA-seq Clustering Assessment - Cambridge**  
Cambridge, UK
- Development of R package for data-driven assessment of clustering
  - Profiled code to identify computational bottlenecks and reimplemented performance-critical parts in C++
  - High-resolution quantification of clustering stability
  - Investigation of how cell types inferred from data depend on clustering results
- 2020-2021 Mapping the Biogenesis of Forward Programmed Megakaryocytes - Cambridge**  
Cambridge, UK
- Characterization of temporal changes in time-course scRNA-seq data
  - Integration with in-vivo dataset to quantify accuracy of in-vitro system
  - Identification of novel surface markers across multiple flow cytometry datasets
- 2020-2021 Consequences of Splitting 10X scRNA-seq Samples Across Sequencing Lanes - Cambridge**  
Cambridge, UK
- Simulation study assessing the downstream consequences of sample splitting, compared to an unsplit sample, throughout the scRNA-seq analysis pipeline
  - Quantification of impact on clustering and cluster marker genes

### Spring 2019 Master's Thesis - Dept. of Mathematical Sciences, Chalmers

- Gothenburg, Sweden
  - Benchmarking of scRNA-seq clustering methods across feature selections and datasets
  - Assessing deconvolution methods' robustness to noise in cell type signatures
  - Successful defense of thesis leading to M.S. degree

### Fall 2018 HIV Transcription Latency - Dept. of Microtechnology and Nanoscience, Chalmers

- Gothenburg, Sweden
  - Investigation of feedback and noise in mathematical model of HIV transcription
  - Stochastic simulations of biochemical reactions with Gillespie algorithm
  - Quantification of uncertainty of molecular concentrations over time

### Spring 2016 Feedback Controller for Ballbot - Dept. of Automatic Control, Lund University

- Lund, Sweden
  - Development of linear state feedback controller for ballbot
  - Evaluating feedback controller and optimizing parameters in simulations with sensor noise
  - Deployment on Arduino microcontroller including interfacing with Inertial Measurement Unit

## Mentoring

2021 Andi Munteanu, UAIC Computer Science M.S. student and Cambridge Stem Cell Institute bioinformatics intern

## Skills and Development

- **Programming Environments:** Python ([Optimization example](#)), R ([Clustering evaluation package](#), [Random Forest feature selection example](#)), Julia ([Outlier detection example](#), [Optimization example](#)), MATLAB, C++, Bash,  $\LaTeX$ , Arduino.
- **Computing Tools:** SLURM, git, Jupyter Notebook ([Example](#)), R Markdown ([Example](#))
- **Software packages:** [ClustAssess](#) - developed from scratch, currently package maintainer [Github](#), [Example](#), [Documentation](#)
- **Professional Courses:** [Python for Bioimage Analysis](#) - week-long course by the Royal Microscopical Society.
- **Self-Studied Books and Courses:** [Intermediate Linear Algebra](#), [Computational Linear Algebra](#), [Real Analysis](#), [Combinatorics & Graph Theory](#), [Reinforcement Learning](#).
- **Webpage:** [sharash.github.io](http://sharash.github.io)

## Journal Publications

- [1] **Arash Shahsavari** and I. Mohorianu. "ClustAssess: tools for assessing the robustness of single cell clustering". In preparation (2021).
- [2] J. Chen\*, V. Sathiaselvan\*, A. Moore, S. Tan, C. S. R. Chilamakuri, **Arash Shahsavari**, C. Jakwerth, S. B. Hake, A. Warren, I. Mohorianu, C. D'Santos, and I. Ringshausen. "[ZAP-70 constitutively regulates gene expression and protein synthesis in chronic lymphocytic leukemia](#)". *Blood* (2021), [Commentary](#).
- [3] M. Lawrence\*, **Arash Shahsavari**\*, S. Bornelöv\*, T. Moreau, K. Kania, M. Paramor, R. McDonald, J. Baye, M. Perrin, M. Steindel, P. Jimenez, C. Penfold, I. Mohorianu, and C. Ghevaert. "[Mapping the biogenesis of forward programmed megakaryocytes from induced pluripotent stem cells](#)". Under review at Science Advances (2021).
- [4] C. M. Morell, S. G. Tilson, R. A. Tomaz, **Arash Shahsavari**, G. Canu, B. T. Wesley, M. Perrin, I. Geti, S. Mukhopadhyay, F. Mazzacova, P. Gissen, J. Garcia-Bernardo, C. A. Rimland, F. Sampaziotis, I. Mohorianu, and L. Vallier. "Novel 3D Approach to Model Non-Alcoholic Fatty Liver Disease using human Pluripotent Stem Cells". In preparation (2021).
- [5] E. Williams\*, R. Chazarra-Gil\*, **Arash Shahsavari**\*, and I. Mohorianu. "[The sum of two halves may be different from the whole. Effects of splitting samples across sequencing lanes](#)". Submitted to Cell Reports (2021).
